

Terna Engineering College
Computer Engineering Department
Program: Sem VIII

Course: Human-Machine Interaction Lab (CSL801)

Experiment No. 3

A.1 Aim: Design GUI for the data entry form for any application of selected domain which you have analyzed.

PART B
(PART B: TO BE COMPLETED BY STUDENTS)

Roll No. 50	Name: AMEY MAHENDRA THAKUR
Class: BE COMPS B 50	Batch: B3
Date of Experiment: 18-02-2022	Date of Submission: 18-02-2022
Grade:	

B.1 Domain selected by student:

Domain: Cloud Computing Services

Registration Form for Cloud Account

B.2 Source Code of GUI:

- **form.html**

```

B.4 Write down what is direct manipulation and its' advantages:

ANS:

Direct manipulation:

Direct manipulation is computer science is a style of human-computer interaction that includes continuous representation of the object of interest and fast, reversible, and incremental actions and feedback. So here this article gives the advantages and disadvantages of Direct manipulation to better understand this topic.

Pros or Advantages of Direct manipulation:

1. It is easy to learn and remember.
2. It is easy to retain.
3. Present task concept visually.
4. Permits error avoidance.
5. It is a flexible and reversible action.
6. Low typing requirement.
7. Encourages exploration.
8. High subjective satisfaction.
9. Predictable and controllable.
10. Permits high subjective satisfaction.
11. Instant visual feedback.
12. User learning time is relatively small.
13. Users feel in control of the computer and are less likely to be intimidated by it.

B.5 Conclusion:

Hence designed GUI for the registration form for Cloud Account for which I have analysed and made form validation.
